Why Use CareNav Health Solutions Services:

- Low start-up costs with affordable monthly fee** - Nothing to buy, low setup fees
- Minimal process to change requirements** – Works with or without an EMR
- Anytime/anywhere access** - High availability systems with convenient access options via the Internet
- Comprehensive, unified, flexible solutions** – Can be customized or integrated in existing software
- Meet industry challenges** - Improve quality and Health and Disease Management compliance while qualifying for pay-for-performance programs

Our Products

After Visit Summary

A summation of a patient's diagnosis, prescribed medications, test results, upcoming lab tests and procedures, and physician recommendations indexed to the latest evidence-based health content which delivers the right information at the right time.

Health Messaging

Two-way patient/provider compliance messaging that enables all parties to securely communicate concerning targeted healthcare behaviors in a configurable management tool. The system includes notification of lab/test results, Rx reorder reminders, and appointment confirmations.

Personal Health Record

Integrated and prepopulated electronic record which allows patients and providers to coordinate care. The PHR has the ability to be exported, in part or in its entirety, to a third party of the patient's choosing.

Caselt - Case identification and stratification technology

Healthcare data inputs are assimilated to identify the care plan gaps with a data triage engine. Caselt serves as the central data hub to integrate evidence-based rules such as HEDIS¹, American Diabetes Association, and American Heart Association

CareNav Health Solutions

Empowering Patients to Manage their Health
